

Diabetes and Endocrinology Care

Nebraska Medicine diabetes and endocrine specialists identify and integrate emerging treatment modalities into the care for diabetes and endocrine patients. Our multidisciplinary care model focuses on leading-edge research, educating future health care providers, and coordinating the treatment of endocrine-related disorders. Our model includes fellowship trained endocrinology physicians, advance practice providers, case managers, nurses, exercise physiologists, dietitians and certified diabetes educators (CDE).

Diabetes Services

- Young adult care (ages 16 to 25)
- Diabetes and hormone dysfunction after kidney/pancreas transplant
- Diabetes in pregnancy
- Post-transplant diabetes
- Cystic fibrosis related diabetes
- Diabetes self-management education, dietitian, prescription and exercise
- Insulin pump and continuous glucose monitoring management
