

Postgraduate Year Two

# Internal Medicine Pharmacy Residency

SERIOUS MEDICINE. EXTRAORDINARY CARE.™

## Postgraduate Year Two

# Internal Medicine Pharmacy Residency

Nebraska Medicine has a rich tradition and commitment to advancing our profession through the training and education of pharmacy residents as future leaders dating back to 1974. Utilizing our ITEACH values, we strive to evolve our program and provide the best training environment possible. In 2023, we are excited to offer an internal medicine residency program in pre-candidate status to meet the growing need for specialists in this area. The resident in this program will join nine PGY1 residents and nine PGY2 residents. We are vested in the success of each resident, and our unique family atmosphere contributes to the professional and personal development of all residents. This dynamic 12-month program is designed to prepare each resident to enter a position as an internal medicine pharmacist for a health system or a clinical faculty member at a college of pharmacy.

### Participate in all our comprehensive pharmacy services, including:

- Anticoagulation, antimicrobial, diabetes and pain stewardship
- Education of patients and health care professionals
- Experience with clinical pathways, protocols and core measures
- Multidisciplinary medical team rounding and transitions of care
- Rapid Response Teams
- Pharmacokinetic services
- Teaching and precepting pharmacy students and PGY1 residents

 Medical or Neurosurgical ICU  
 Medical Oncology  
 Neurology  
 Stewardship (Anticoagulation,  
 Diabetes or Pain)

## Practice Area

Nebraska Medicine is the clinical partner of the University of Nebraska Medical Center, which includes the Colleges of Medicine, Pharmacy, Nursing, Dentistry and Allied Health. UNMC, with an enrollment of more than 4,000 students, is the only public academic health science center in Nebraska and is internationally recognized as a leader in patient care, research and education. The not-for-profit hospital is known for excellence and innovation in medicine.

Nebraska Medicine is an 809-bed health system with two hospitals. The resident will be based on the Nebraska Medical Center campus. It is designated a Comprehensive Level One Trauma Center with more than 63,000 emergency room visits per year. It is a respected leader in solid organ transplantation, heart and vascular, antimicrobial

stewardship, biocontainment, blood and marrow transplantation, cancer and neurosciences.

Nebraska Medicine brings together the expertise of private practice medicine with the strengths of an academic health center. The many areas of specialization give each resident a variety of experiences, from the critically ill neonate to the cancer patient undergoing blood and marrow transplantation. Through collaboration with the Division of Hospital Medicine, our decentralized practice model combines state-of-the-art research, education and exceptional patient care, offering an optimal training and practice environment.

The working relationship between Nebraska Medicine and the UNMC College of Pharmacy provides a solid foundation for a quality pharmacy residency program. The program provides an excellent mixture of clinical experiences, one-on-one interaction with faculty and preceptors, and the flexibility to modify the program to meet each resident's needs. In addition, the residency provides many opportunities for educating students and preceptor development. There is an opportunity to become a chief resident and mentor others in the residency program. We pride ourselves in pharmacy training that actively involves the resident in patient care, teaching and research.

## Application Requirements

- Applicants shall be graduates of an Accreditation Council for Pharmacy Education (ACPE)-accredited Doctor of Pharmacy degree program
- Applicants must be completing or have completed an ASHP-accredited or candidate-status PGY1 residency
- Applicants must be licensed or eligible for licensure as a pharmacist in the state of Nebraska. Licensure must be obtained by July 31
- Applicants shall participate and adhere to all rules of the ASHP Resident Matching Program

## Application Information

The PGY2 Internal Medicine Pharmacy Residency conducted by Nebraska Medicine at the location below has an accreditation pre-candidate status with ASHP. Candidates are required to complete and submit an online electronic application through PhORCAS.

**Required application materials include the following:**

- Letter of intent (addressing program-specific questions)
- Curriculum vitae
- Pharmacy school transcripts
- Three PhORCAS standardized references

Please visit [NebraskaMed.com/Pharmacy/Residency](http://NebraskaMed.com/Pharmacy/Residency) for additional application information.

Deadline: **Please refer to the date in PhORCAS**

## About Omaha

Omaha, Nebraska, has been ranked among the top 15 Best Affordable Places to Live (U.S. News and World Report), one of America's 20 Best Cities for Young Professionals, and one of the Best Places for Business and Careers (Forbes). It is also among the top 10 cities to raise a family (Forbes).

The metro area community of nearly 1 million is home to national events such as the NCAA Men's College World Series and basketball tournaments. Omaha's Henry Doorly Zoo and the historic Old Market district are nationally-renowned attractions. The Joslyn Art Museum, the Gene Leahy Mall, and a wide variety of shops offer area residents an exciting cultural experience.
